

SonicWALL TELE3

INTERNET SECURITY APPLIANCE

- ▷ *Dedicated security ASIC for fast firewall and 3DES VPN performance*
- ▷ *IPSec VPN delivers secure access through any IPSec-compliant VPN gateway*
- ▷ *Easy management interface reduces deployment time and costs*

The TELE3 Internet security appliance is an easy-to-deploy, enterprise-class firewall and VPN connectivity solution for telecommuters and day-extenders who require fast and secure access to their organization's network resources. With its intuitive Web management interface and administration wizards, the TELE3 reduces the time and cost of installing and managing secure connectivity access.

The desktop TELE3 provides hardened firewall protection with an ICSA-certified, stateful packet inspection firewall with integrated IPSec VPN. The TELE3 delivers fast, secure access to corporate resources and is compatible with any manufacturer's IPSec-compliant VPN gateway.

Built on SonicWALL's dedicated security ASIC, the TELE3 delivers the fastest performance in its class with hardware-accelerated 3DES VPN. By offloading processing overhead associated with encryption, the security ASIC guarantees the best performance for broadband connections.

The TELE3 also supports the comprehensive portfolio of SonicWALL security services, including Network Anti-Virus, Content Filtering, and Authentication Service. This eliminates the cost and complexity of integrating separate devices and software packages.

The TELE3 requires no operating system maintenance often found in software-based security products. The TELE3 fits perfectly into a large corporate network infrastructure and can be managed by a wide array of local or remote options including CLI, Web-interface, and SNMP. For centralized management and policy setting, the SonicWALL Global Management System is designed to reduce administration overhead as security requirements scale.

The TELE3 Internet security appliance meets the demands of telecommuting programs and adapts to network security threats, protecting an organization's valuable data.

SONICWALL

SONICWALL TELE3 FEATURES AND BENEFITS

IPSec VPN. The TELE3's enterprise-class VPN delivers fast, secure access to corporate resources and is compatible with any manufacturer's IPSec-compliant VPN gateway.

Comprehensive Security Solution. The TELE3 provides everything needed for secure connectivity and supports SonicWALL's comprehensive portfolio of security services, such as Network Anti-Virus Content Filtering, and Authentication Service, without the need to install separate devices and software packages.

ICSA-Certified Stateful Packet Firewall. The TELE3 adheres to industry standards for enterprise-class firewall protection with ICSA-certified, stateful packet inspection technology.

Powerful Architecture with Dedicated Security ASIC. Built on SonicWALL's dedicated security ASIC, the TELE3 delivers breakthrough performance with hardware-accelerated 3DES VPN. By offloading processing overhead associated with encryption, the security ASIC guarantees the best possible performance for broadband connections.

AutoUpdate Security. SonicWALL's AutoUpdate service sends automatic alerts of new software and feature updates as soon as they're available to ensure administrators keep network security current and lower maintenance costs.

Flexible Remote Management. The TELE3 fits perfectly into a large corporate network infrastructure and reduces administration overhead because it can be managed locally, on a device-by-device basis using CLI, or globally using SonicWALL Global Management System.

Complete Network Protocol Support. The TELE3 supports the full complement of broadband connectivity requirements, including NAT and DHCP, to allow all users to share a broadband Internet connection. It also supports Point-to-Point Protocol over Ethernet (PPPoE), a widely used protocol for DSL connections.

Intuitive Web Management Interface. The TELE3 includes an easy-to-use Web management interface and administration wizards to dramatically reduce the time and cost of deploying secure connectivity.

SONICWALL TELE3 TECHNICAL SPECIFICATIONS

Processor:	Toshiba-133MHz with SonicWALL's security ASIC	Firewall Nodes:	5 Nodes	Power:	100V to 240V AC
RAM:	16 MB	Concurrent Connections:	6,000	Standards:	TCP/IP, UDP, ICMP, HTTP, RADIUS, IPSec, IKE, SNMP, FTP, DHCP, PPPoE
Flash Memory:	4 MB	3DES (168-Bit):	20 Mbps	Certifications:	ICSA Firewall
Interfaces:	(1) WAN 10/100 Base-T auto-sensing (1) LAN 10/100 Base-T auto-sensing (1) Serial Port	VPN Tunnels:	5 Tunnels	Regulatory Compliance:	EMC: FCC Class B, ICES-003 B, CE, VCCI B, C-Tick Safety: UL, cUL, TUV/GS
Firewall Performance:	75 Mbps	Dimensions:	8.25 x 6.5 x 2.0 inches (20.9 x 16.5 x 5.1 cm)	Environment:	Temperatures 40-105° F; 5-40° C Humidity 5-90% non-condensing
		Weight:	1.1 lbs. (.48 kg)		
		LEDs:	Status (Power, Test) Ethernet (Link, 100, Activity)		

- 1) Power LED
- 2) WAN Port LEDs
- 3) LAN Port LEDs
- 4) Test LED

- 5) Serial Port
- 6) 10/100 Ethernet Ports LAN, WAN
- 7) Power Input
